

The amount of gratuitous sex and foul language during PRIME TIME, as well as blood and gore on all of these CSI and police programs, is OF COURSE harmful to our youth. Unfortunately, there is not as much parental control over the television and so children have free reign. Is it any wonder teen crimes are increasing??? Where do you think they get their ideas?

The television as well as movies, are "pushing the envelope" and testing FCC regulations when they keep introducing more and more undesirable programing. The question is: Will anyone have the decency and courage to put a stop to it?
